

## SchoolOne Attends 2011 eTech Conference

SchoolOne took part in the annual Ohio Educational Technology Conference at the Greater Columbus Convention Center this week. The event marked the 12<sup>th</sup> year in which SchoolOne has participated. The event's purpose is to bring educational leaders and IT professionals together to foster collaboration between technology and education.

The event featured over 225 exhibitors and included presentations on a variety of discussion tracks:

- Planning and Designing Learning Environments
- Building and Budgeting for Technology Environments
- Designing, Implementing, and Evaluating Effective Learning
- Fostering Collaborative Environments
- Applying Technologies in Learning and Assessment

*SchoolOne raffled an iPod touch to draw attention to mobile learning and other emerging technologies.*

Michelle Tomallo, Co-Founder of SchoolOne, said, "It was great that our software has so many features that were the subject of the breakout sessions. Teachers and tech coordinators were eager to learn about the data assessment tools, report capabilities, and mobile learning applications we offer."

SchoolOne, which provides a web-based Student Information System (SIS) and IT support services, is integrated with ActivProgress, a data analytics/assessment toolset, and is the exclusive North American reseller of the mobile learning platform Studywiz. "We looked for best-in-class partners to complement our SIS—and with Promethean and Studywiz we have that," said Tomallo. SchoolOne's approach is to provide an end-to-end platform that includes IT infrastructure, teacher tools, student data, and learning.
